:woohoo: Fantastic program. I would like to know where to find the extensions described in the documentation at ""ARI Layer Slider" addons""?

for example, where do I find as described ""ARI Layer Slider" module. It is used to load sliders into module positions."" and the others?

...and again, superb program.

:blush: I found out how, and will explain here for anyone else that might be mystified, or brain freeze out like mine!

I found them in the Extensions > Plugins and searched for ari then I enabled the plugins and reviewed their parameters.

Thanks

Hello,

It is possible to select addons which will be installed during installation of the extension:
