Elements remaining in place between slides?

Posted by k8fisher - 2016/10/05 11:40

_____

Hi

Ive been searching all over for a feature rich slide component such as your own, thank you for your efforts on behalf of the community. I was wondering is it possible to achieve an element which remains in place across multiple slides ? E.g. In animating between slides an element remains between slides?

Ive not seen a joomla site achieve this as most slide components are built from the assumption that moving between slides leads every element on the slide to switch.

Can an element exist in place across multiple slides in ARI Layer slider? Appreciate any thoughts as my research so far hasn't turned anything up so far unfortunately.

K

_____

Hello,

Sorry, but the extension doesn't support ability to add an element which will be sticky and shown over all slides.

Regards,
ARI Soft
