
Problem installing package

Posted by alucard_mx - 2017/06/30 20:44

Hello, I would like to help you with my problem,
I have a problem with the package, it remains loading the package and it does not pass from there, and then when I check if it is installed, everything is installed except the module, what can I do? , I occupy Joomla! 3.7.2

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?
