
Is it possible to remove the loading slider?

Posted by itman - 2018/10/23 14:44

Can anyone please advise me on how to remove the loading progress bar on the slider.

The layer slideshow loads lovely and quickly with a loading progress bar which goes straight to 100% which ruins the effect of the slideshow.

many thanks for any help

Hello,

It is not possible to switch off the loading bar in slider settings, but you can add the following CSS rule to a site template CSS file:

```
.x_preloader * {display:none!important}
```

Can you please let me know where in the CSS file. Is is right at the top or in body{} or html{} etc

Many thanks
