Hello,

Is it possible to see the problem anywhere?

Regards,  
ARI Soft

It seems this is a problem with site template or 3rd party plugin. jQuery library which is added via Joomla! API is not loaded on your site. We can investigate the problem in more details if you provide a temporary access to your J! backend by email.

Try now please. We disabled "Compress JS" option in site template settings.

Open "Extensions -> Templates -> Styles" page on Joomla! backend, select your template and configure the parameter on template settings page.
