
K2 Support

Posted by dave_logic - 2015/12/14 00:01

Does this plugin work in K2 Articles ?

Regards,

Dave

Hello,

The extension can be used in K2 items.

Hi,

I have purchased this now however :

The Plugin

I can upload via the backend however when I try and Insert / select the image nothing happens - This is the same for both K2 and Com_content

The Module

I can upload via the backend and select the image within the module however I soon as I publish the module it crashes the site with an Internal Script error.

Permissions on the default image folder are correct and writable.

Regards,

Dave

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?
