
Picture Size not equal?

Posted by CST63 - 2016/06/23 20:45

Hello,

the Pictures on the Attache are 1200 x 800 are different large displays?
Why the images are not the same size display?

Can I assign to the images sizes somehow?

Best Regards

Hello,

Could you send a link to a page where the problem occurs?

Regards,
ARI Soft

It seems the extension can't retrieve dimensions for some images (probably a problem with file permissions or images are corrupted) and default value (768px) for max-width parameter is used. Add the following CSS rule to a site template CSS file to increase this value:

```
BODY DIV.cd-image-container {max-width:1200px;}
```

and clean browser's cache.
