The module influences the entire page
Posted by Foued - 2016/11/29 09:34

_____

Hello,
I have a major concern on my page. So at page loading this is normal, but that the button returns to action influx directly on the rest of the page, right or left. :S
cordially

_____

Hello,

Is it possible to see the problem anywhere?

Regards,
ARI Soft

_____

Hello,
What do you mean? On all pages? No, this is the only page where I use this module. But I suppose yes because it influences the footer

_____

Could you provide a link to a page where the problem occurs so we can investigate the problem? It can be a conflict with a 3rd party extension. If it is private, you can send the link by email.

Regards,
ARI Soft

_____

Fixed. It was a conflict with site template. The problem is fixed in v. 1.1.1
