
max width of popup

Posted by ferino - 2016/09/21 12:21

Hello,
thank you for nice popup plugin. Everything works fine, but I miss the option to set max-width of video (iframe window) that is in
media/arimagnificpopup/css/magnificpopup.css at line 225

Thank You and sorry for my english.
Fero

Hello,

Thank you for your suggestion. We will add this parameter in a future version. Currently it this CSS property can be overridden if add the following CSS rule to "Advanced -> Custom styles" parameter in plugin settings:

```
BODY .mfp-iframe-holder .mfp-content {max-width:1024px;}
```

Regards,
ARI Soft
