Hello!
I try to use Ari Magnific Popup on my site and it wors nice.
After updating of Joomla to 3.7.0 in Internet Explorer I found a problem. All inline content is visible on the page under the pictures with popup links. I really don't know who to fix it.

Please!!! Help!!!

Regards

Hello,

Could you provide a link to a page where the problem occurs and specify what IE version you use?

Regards,
ARI Soft
