
Responsive Pop Up for URL

Posted by Neoma - 2017/07/28 08:08

Hello,

I have a problem with URL pop up.
It is not responsive in Height.

The box is blocked in width / height adaptative.
I would like height adapte to content.
Responsive :S

Is there a solution?

thanks

Find by myself :)

```
.mfp-iframe-holder .mfp-content {  
  line-height: 0;  
  width: 100%;
```

```
height:100%;
```

```
    max-width: 900px; }  
.mfp-iframe-holder .mfp-close {  
  top: -40px; }
```

I have same question. Your reply sounds good, but where do you actually enter that piece of code?
