Package

Is there a package where Magnific Popup is included (like Ari Smart Content) or can I only buy this standalone? Are there other packages like the Ari Smart Content package? I only can find this on the product side, but I would like to buy a lot of several plugins from Ari, because I like them very much ...

Hello,

"ARI Magnific Popup" is not included into other packages. BTW, we have free version of "ARI Magnific Popup".

Regards,
ARI Soft
