
No Shortcode Generated

Posted by TomFullen - 2020/03/25 20:54

Hello,

I just purchased and downloaded Magnific Popup Pro and installed it successfully. However, when I add a popup no code is generated. The plugin seems quite simple to use but I can't figure out what's going on.

Trying to add a splash popup in an Joomla article.

Joomla 3.9.5

Your help would be greatly appreciated.

Thank you,
Tom Fullen

Hello,

Do you use the editor button or how you generate a code? Is it possible to see the problem anywhere?

BTW, you can add shortcode manually. For this switch WYSIWYG editor to plain text mode and enter the following code:

```
{popup splash="1"}{content>Hello!{/content}{/popup}
```

Regards,
ARI Soft
