
Pop Up Window Size

Posted by ukfish1 - 2020/04/07 14:44

Is there a way to determine the width and height of the pop up window or set it to auto size dependent on the size of the contents?

Thanks, Paul

Hello,

Could you specify for what content type you want to set size?

Regards,
ARI Soft

Thanks.

It's for a URL using this code

```
{popup url="seven-ages-of-debt-film-new.html"}
```

Thanks again

paul
