Problems with Migration
Posted by carbon - 2017/02/22 08:40

_____

I am using the Ari Stream Quiz Pro version. While migrating my site to a new host, I'm getting this error:

Fatal error: Using $this when not in object context in /home/reviewst/public_html/sparkconnections/wp-content/plugins/ari-stream-quiz/includes/class-plugin.php on line 24

Appreciate some help! Thanks! :)

_____

Hello,

Check that PHP 5.4.0+ is installed on your server.

Regards,
ARI Soft

_____

The server has PHP 5.5.32 installed.

_____

Could you install Display PHP Version plugin or other similar plugin and check PHP version or deactivate and then activate again "ARI Stream Quiz" plugin, the plugin checks system requirements on activation.

PS: The error can occur only in PHP 5.3 or below.

Regards,
ARI Soft

_____

Thanks for your help! Double checked and realised that the server was indeed using PHP 5.3. I've already changed it and it's working fine now.

Thanks! :cheer:

_____

You are welcome :)

PS: We would be very happy to receive a feedback about the plugin. Probably you have some ideas about improvements or new features. You can send it by email.

Regards,
ARI Soft
