
trivia quizz questions

Posted by SUZY A PARIS - 2017/03/02 17:04

Hi there,

I just downloaded your ARI stream quiz plug in, and I have a couple of questions.

I first tried to set up a trivia quizz with answers being pictures. I would like to display 4 answers in one row, but I couldn't find out how. I selected 4 in 'image answer per row' but I only get one (see attached screenshots)

Also, I would like people to be able to select multiple answers but I couldn't find out how.

Finally, I'm interested in a personality quizz with email collection. Would it be possible to get quizz result in mailchimp datas so that I can use the result to segment my emails?

Many thanks in advance,

Hello,

1. It should be enough to set the parameter to 4. Could you provide a link to a quiz, probably it is a style conflict with 3rd party plugins or theme.

2. Multiple answers are supported only by "ARI Stream Quiz PRO" since v. 1.4.0. It is enough to select several answers in question settings.

3. Currently the extension sends name and email to MailChimp, but we are going to improve integration with MailChimp and other email marketing services in the next major version of the plugin (PRO version) and it will support segmentation. It will be ready next week.

Regards,
ARI Soft

Hi,

1. here is the link to the quiz. I'm using the theme 'Make'

2. great, thanks!

3. Sounds good to me. Until the next version, is it possible to extract a .csv that shows both the quiz result and email address?

Many thanks,
suzy

Hello,

1. Sorry, but it seems you forgot to specify the link. If it is private, you can send it by email.

3. "ARI Stream Quiz PRO" can export results to CSV format. It contains name, email and result. You can check it on demo site. Open "ARI Stream Quiz -> Results" page.
