Add Explanation to the Question - not working
Posted by bartblum - 2017/04/03 20:33
_____

** Nevermind - I found the additional settings - it works.

I can't get the "Add Explanation to the Question" to show the text I've included. I have the box for the field checked. Is there a trick to it?

I'm making a quiz and I have indicated which of the 3 answers are correct.

Just purchased/downloaded today 4/3 so I'm sure I'm using the most-recent update.

Can be seen at http://www.cpnphiladelphia.com/tablet-sweepstakes/

I've only added a couple questions while I test.

Thanks!

_____

Hello,

Open "GENERAL" tab on "ARI Stream Quiz -> Settings" page and check that "Show result per question" parameter is set to "Immediately after user answer" or "When quiz is completed" value.

PS: We will add this question to F.A.Q.

PPS: If have any other questions or suggestions about the plugin, feel free to contact us. We would be grateful for any feedback.

Regards,
ARI Soft
