Opt-in with Aweber not working

Posted by AlignToDivineHealth - 2017/07/09 21:57

_____

I have created a quiz, created a new list in Aweber, integrated the quiz settings with my Aweber account. At the end of the quiz it asks for name and email, put it in and you get your results. But there is nothing happening on the other end with the email addresses. Aweber shows no new sign ups and no email is generated to send to the person taking the quiz (even though I have that set up in Aweber as well).
Not sure if I missed a step or what. I have paid accounts for both the quiz and Aweber. Any ideas?

_____

Hello,

Could you provide a temporary access to your WordPress backend and a FTP access to /ari-stream-quiz folder by email so we can check plugin settings and investigate the problem?

Regards,
ARI Soft
