
Start quiz immediately not working

Posted by sachin.patel - 2017/07/11 02:10

I purchased the plugin from codecanyon.net website, downloaded and installed. When I tick the option for "Start quiz immediately" in Personality Quiz, it doesn't start the quiz at all and doesn't display any questions. Could you please advise asap since I need the quiz up and running today?

Thanks in advance.

I figured out that in file `/wp-content/plugins/ari-stream-quiz/includes/views/quiz-session/tmpl/page_questions.php`, a shorthand php tag is used which does not work on some servers.

Hello,

Thank you for your report and sorry for inconvenience. We will fix it in the next version of the plugin.

Regards,
ARI Soft
