Exporting to CSV does not include Name and Email

Posted by sachin.patel - 2017/07/11 04:02

_____

Name and emails are being displayed on the results page. However, they are not being exported in CSV file. Is there any setting needs to be tweaked?

_____

Not sure how, but it didn't work on local and it works on live server. Weird!

_____

Hello,

Could you send a CSV file which is generated on your local machine by email and specify what version of PHP and WordPress is used?

Regards,
ARI Soft
