Share Settings for Social Media

Hey, guys! Thanks for making such a beautiful plugin. It's very graceful. But there's a little problem that I'm hoping you can help me fix. When the player shares their results, the image that shows up is not the page's featured image, which I set up on the WP page itself, but another image that is on the page. Ideally, the image that would show would be the corresponding Results image. Is that possible to do?

Hello,

Sorry for inconvenience, we will fix the issue in the next major version of the plugin. Suppose it will be ready within a week.
