
Export and share Quiz?

Posted by lynmangoro - 2017/07/20 12:35

Hello

Now we have launched our quiz at <https://oliviastefanino.com/money-type-quiz/> and we are very very happy with it - we have had some people interested in having our quiz on their website. We are thinking of 'licensing' it out... would this be possible technically? Can we export the quiz and they import it on their site? How would this work with liscence for them to use your plugin?

Thanks for your help
Lynda

Hello,

Do you want to provide ability to embed quizzes from your site on another sites (for example like embed code for YouTube videos) or need something another?

Regards,
ARI Soft

That could be one option, yes!

But we would also like to offer a solution where people can embed the quiz but edit the results to link to teir own mailing lists.

We are going to add import/export functionality to the plugin. In this case you can export the quiz and other people can install "ARI Stream Quiz" on their sites, import your quiz and configure it for your needs. Is it suitable for your needs?

Regards,
ARI Soft
