# Personlity Scores Not Showing

Hello

When I created the firts personality quiz on one client site on the results page it showed the main personality wiht score and description, and then listed the other personalities with their scores.

I tried to create this same thing on another site for another client but it is not showing the score for any of the personalities.

Our answers are all weighted with a number (3 for agree, 1 for neither, 0 for disagree, towards one of the personalities) and I expect it to show the score for each personality but it's not showing.

The quiz that is not showign the score is here: http://myvabusiness.co.uk/money-types-quiz/

Thanks

Hello,

Open "PERSONALITIES" tab on quiz settings page and check that "Show several personalities on final page" checkbox is checked and "Count" parameter is set to 0.

 http://www.ari-soft.com/images/fbfiles/images/personality.jpg

After this open "SHARING" tab on "ARI Stream Quiz -> Settings" page and check "Title on result page" parameter in "This parameters section is used to configure sharing content for personality quizzes" section. For example populate it with the following value:

You are {{title}} - {{score}} ( {{userScorePercent}} % ) / {{maxScore}}

Hello:

I've installed the free plugin. It was working, except for the fact it was not sharing images. The, I bought the premium pro plugin and installed it. It became a mess. I'm not used to developement, but I have several JS error in console.
I may ask you to check it for me.
Can you do that, please. Please, take a look a result page. And, then, take a look at how Trivia has become a mess after pro plugin install. The most weird thing, It was working on free version.
As you can see, there are some tags showing in my theme now. The show by the first time quiz loads and when user answer question, they get a blank box.
