Points With Each Result

Posted by satindersingh - 2017/09/27 09:34

_____

Hi,

I purchased your plugin from codecanyon after confirming from you that I can show points of each results on final result page but it is not working please help me.

What I want:-

Personality 1 :- 28 points
Personality 2 :- 13 points
Personality 3 :- 05 points

But What I'm receiving,

Personality 1 :- 28 points
Personality 2 :- 28 points
Personality 3 :- 28 points

It is showing only the higher personality result with all personalities which is wrong.

Hello,

Open "SHARING" tab on "ARI Stream Quiz -> Settings" page and check value of "Title on result page" parameter in "Personality quizzes" settings. It accepts some predefined variables. For example populate it with the following value:

You are {{title}} - {{score}} of {{maxScore}}

Regards,
ARI Soft
