
Facebook sharing dialog not populating with data

Posted by simonpayn - 2017/11/01 18:44

I have set up Facebook sharing. I believe I have followed the instructions carefully, including adding the app ID. However, when I click to share on Facebook, the box is not populating with the quiz information.

You can test it at <http://marketstats.ca/which-lake/>

I looked at old threads here but couldn't find one relevant that answered my question.

Thanks
Simon

Hello,

Could you provide a temporary FTP access to /ari-stream-quiz folder by email so we can investigate the problem?

Regards,
ARI Soft
