
Quiz questions in random order

Posted by philono - 2017/11/02 16:05

In the quiz settings, when I have both "Random questions" and "Start quiz immediately" unchecked/disabled, my quiz questions appear in random order.

When "Start quiz immediately" is checkmarked, the questions appear in correct order.

Also, when I'm logged in to the WP site hosting the quiz, the questions appear in correct order. But random order when I'm logged out.

I want my questions to appear in the correct order when "Start quiz immediately" is unchecked.

Hello,

Do you use "ARI Stream Quiz" or "ARI Stream Quiz PRO"? What version of the plugin do you use? Is the problem occurs when show all questions on a page or when paging is used?

Regards,
ARI Soft

I use ARI Stream Quiz PRO latest version. I'm using paging, 100 questions on 4 pages (25 questions/page). It works on Firefox and Safari, but on Chrome (Mac) it is in random order when both "Random questions" and "Start quiz immediately" are unchecked/disabled.

But when I checkmark "Start quiz immediately," the questions appear in correct order in all cases, even in Chrome.
