## Link in Question Title

Posted by eliaslange - 2017/11/28 13:42

---

Hi.

How to add a clickable link (target="\_blank") to the question title?

I need this as the user need to go to another page to do something where a result is showing up which he needs to answer the question.

Cheers,  
Elias

Never mind... I have just tried with an HTML link in the title and it works. Only the font-size of the title and link are different and should be the same:

Link property used for the link styling

```
.asq-theme, .asq-theme * {  
    font-family: Montserrat, Tahoma, sans-serif;  
    font-size: 16px;  
    line-height: 1.5;  
}
```

Question Title Property

```
.asq-theme .quiz-question-title {  
    font-weight: 700;  
    font-size: 1.5em;  
    margin-bottom: 10px;  
    text-align: center;  
}
```

OR maybe using something like

```
.asq-theme .quiz-question-title a {  
    font-weight: 700;  
    font-size: 1.5em;  
}
```

will do it.
