## Share results

Hi,

when the user is supposed to share their quiz results, not the result is being posted, but the link to the page itself. Isn't the user supposed to share his result (with result image/score etc...)?  
I already got a Facebook APP Id.

You can see the quit at [www.ohr-training.de/welches-ohr-bist-du](http://www.ohr-training.de/welches-ohr-bist-du)

Best regards,  
Christian

Hello,

Update the plugin to v. 1.5.11 please. It should help.

Hello,  
wow that was quick, thank you.  
That did it with facebook. Are Twitter and Google+ supposed to work the same? Because with Twitter only the results text is shared together with the link to the quiz, no result image or description here. Google+ shares only the link to the post to the quiz, no results.

Twitter post contains text which is defined on "Shared" tab on "ARI Stream Quiz -> Settings" page (see "Content of Twitter post" parameter). Google+ doesn't contain image.

Thank you, all clear now.  
By the way, I enjoy using the plugin - thanks for your work.

Regards,  
Christian
