No padding between the checkbox and the answer tex
Posted by laskovic - 2017/12/03 23:30

_____

Hi there,

I've just started using your plugin and run into the following issue. There is no padding between the checkbox and the answer text. Please take a look: http://www.jasminalolin.com/kviz/.

Would I need to add some custom CSS or something else?

thank you in advance!

_____

Hello,

This problem with theme styles. It has global definition for LABEL element. Open "Advanced" tab on "ARI Stream Quiz -> Settings" page and populate "Custom CSS Styles" parameter with the following code to fix the problem:

.asq-theme .quiz-question-answer-controls LABEL {text-indent: 0;}

Regards,
ARI Soft
