## Keep custom language file after update

Posted by Kupol - 2018/01/17 13:05

---

Hi,

Thank you for solving most of the problems that I wrote to you about earlier. But it seems like the problem with the custom language file disappearing during updates still is here. Or is there a solution that I have missed?

I would greatly appreciate if you could fix it so that I'm able to update the plugin without the update deleting my custom language.

Best regards

Erik

Hello,

Read this post please. It contains the solution.

Regards,

ARI Soft
