
Personality result in score form at the back end?

Posted by greatzhao - 2018/01/28 12:45

Hello,

I know that I can custom the "Title on result page" in {{score}} form, but what if I just want to check this form of result at the back end? For now, I can only find the result with the highest score at the back-end.

Thanks

Great

Hello,

If you mean personality tests, currently the plugin doesn't show results for each personality on backend. We will add this feature to a future version of the plugin.

Regards,
ARI Soft
