
Mutiple answers on the same row?

Posted by eskilmn - 2018/01/29 00:09

Hello!

Is it possible to add multiple answers on the same row? The screenshot provided is of desktop, but I would also like it to be possible on mobile so users doesn't have to scroll up and down so much, thanks.

Hello,

You can use "Image answers per row" parameter from "General" tab on "ARI Stream Quiz -> Settings" page to specify how many image based answers should be shown in one row.

I've already tried this and it doesn't work for me. They images themselves don't take up so much space but the actual answer box takes up a ton of space.

Could you provide a link to a quiz where possible to see the problem? If it is private, you can send it by email.

Regards,
ARI Soft

It doesn't work because the plugin supports value from 1 to 4 for "Image answers per row" parameter. We will extend this value till 8 in a future version, currently you can use the following workaround. Open "Advanced" tab on "ARI Stream Quiz -> Settings" page and populate "Custom CSS Styles" parameter with the following value:

```
.asq-theme .quiz-question-has-image-answer .answer-col-6 .quiz-question-answer-holder {  
  -ms-flex: 0 0 16.6%;
```

flex: 0 0 calc(16.6% - 1px); }
