## Add shortcode button after result?

Posted by eskilmn - 2018/01/30 15:51

---

Hello!

I want to add a shortcode button: ()

After the personality test has been completed and the result is showing (below the description of the personality)

Is this possible? Right now, when I paste the shortcode within the description it just outputs the shortcode and not the button.

Hello,

Open "Settings" tab on quiz edit page and enable "Support shortcodes in quiz description, questions, answers and results" checkbox.

Regards,  
ARI Soft
