
Quiz isn't working on my webpage

Posted by mfmazzero - 2018/03/03 12:17

Hi there!

I don't know why the quiz which I made ("X") is not working on my webpage. :(

I'm using the OptimizePress theme and inserting the code where it supposed to be.

Please, find attached a print screen of the internal page (ps_quiz_code.png).

Webpage: <http://www.bebecomrefluxo.com.br/sobre-2/>

Regards,

Marcelo. http://www.ari-soft.com/images/fbfiles/images/ps_quiz_code.png

Hello,

For some reason javascript files/code which is added using WordPress API by the plugin is not added to the page. It can be a problem with 3rd party plugin (for example caching plugin)/ theme. Try to use the following shortcode:

It's working fine now! :)

Thank you very much!

Regards,

Marcelo.
