
MailChimp integration

Posted by laskovic - 2018/03/03 14:33

Hi there,

I've added Mailchimp API key to the settings, yet I don't see any of emails added to the Mailchimp lists.

Am I missing something? Any suggestions?

Thank you

Nenad

Hello,

Have you configured parameters like on the screenshot below?

Thank you, that did the trick!

BTW, I didn't see in the documentation and missed since I was looking only in the general configuration.

thank you again on a prompt response

Sorry that the description in documentation is not clear enough:

http://www.ari-soft.com/images/fbfiles/images/mc_doc.jpg

We will update it.

Regards,
ARI Soft
