
Some quiz images missing

Posted by mrswisesturt - 2018/03/06 13:42

My quiz has been working normally for about a month but some of the image questions are now not showing the image answers (or they appear briefly then disappear). I have gone in and resaved all questions/answers but the same happens. it isn't the same images each time. Latest version installed and latest version of wp being used.

if you want to have a look you can see the quiz here:

<https://dogdesignstudio.com/quiz/take-quiz/>

Thanks.

This conflict with PageSpeed module which is used on your site. Open "Advanced" tab on "ARI Stream Quiz -> Settings" page and uncheck "Images lazy loading" checkbox to avoid the problem.

Regards,
ARI Soft
