
Multiple answers per question

Posted by MStock - 2018/04/01 17:49

Hi,

I have created a quiz where multiple answers are correct, see image attached. When user has marked the first answer, I immediately get feedback whether answer was right or wrong. I was hoping the feedback to show up after the user has marked finished the answers.

1. Could you provide some solutions to this?

2. I assume this is because I have chosen "Immediately after user answer" in the settings. Changing it to "when quiz is complete" would probably solve the problem. However, I want the other quizzes I have made to use "Immediately after user answer". Is it possible to change this setting per quiz basis instead of as a global option? I don't mind changing it in the code.

3. Will "multi-page quizzes" solve my initial problem even if I have enabled "Immediately after user answer"?

Thank you in advance!

Regards,

Hello,

1. Could you provide a link to a page where the problem occurs?

2. Currently the plugin doesn't provide ability to change this option on quiz level. We can add a custom filter to the next version which can be used to override settings for specific quiz (via custom PHP code). Is it suitable for you? PS: we will add ability to change some global parameter in quiz settings in a future version of the plugin.

Regards,

ARI Soft

Thank you for your reply.

Here is the URL: <http://www.appide.no/fi9fjdld/>

And a custom filter sounds good. Do you think it will be able to solve my issue regarding multiple answer questions?

Thank you.

About #1, do you want to show results at the end of quiz or want to create multiple answers question (where users should select several answers)? Currently multiple answers are not supported for trivia quizzes.

Hi,

I would like to create multiple answers questions. Do you have any plans or even ETA to launch this feature?

Thank you.

We will add this question type to PRO version, but currently we can't say when it will be available.
