
captured data - are they stored?

Posted by irolf - 2018/05/09 13:31

I just give Ari Stream Quiz a testrun â€œ as I can't use MailChimp or one of the other listed providers I'm curious where the captured data are saved.
or if there is a hook to save them somewhere in the database?

thank you for your feedback
rolf

Hello,

PRO version can store results into a database and they are available for administrators on backend side.

Regards,
ARI Soft
