ARI Stream quiz personality type results
Posted by hypnoarts - 2018/05/12 15:29

_____

Hi, I'm hopping to transfer my profiling test from typeforms. Currently it sends the full results for each of five type to my active campaign along with the strongest profile type. From there we run an AC automation to deliver results.

We've tried zapier but that just sends the result not the full info.

We also need to outputdouble profiles if scores match but would be happy to display these as percentages?

IE
Your Profile is
PREDICTOR - CREATOR
Your Full Results
Observer 2 - Evaluator 1 - Predictor 3
Creator 3 - Performer 1

I've brought the pro developer to see if it could do this. Thanks for your help.

_____

Hello,

The plugin sends top personality to Zapier. We can investigate ability to extend this functionality if you describe what parameters/variables you are expected to see on Zapier side.

Regards,
ARI Soft

_____

We need it to work out the top score or a matching double top score, or if 3 scores are the same to put at the top the first one of those.

We have to have all the scores, or, it needs to work them out as percentages.

Thank you
