_____

Hello,

1) We are using Copy protection plugin for Restricting user to copy any content, images and video. But for Quiz this is not working. We need copy protection to all content of quiz. How we can use ? (On description if we added videos able to download).

2) Image zooming option required for Quiz section. We can write scripts which works for Post and pages of wordpress. But unable to use for Quiz. How we can use Zooming options for Images of Quiz (Question image, option image and description image)

3) Video full width play option required for us. How we can do ? We want saperate player for Video How we can develop ? Which function need to edit ?

Hello,

1. We don't know how your protection plugin works. "ARI Stream Quiz" can pre-loade questions and also can load them via AJAX. Probably code/plugin which you use can't work with AJAX/dynamic content.

2. It looks like as the same problem which is described in answer #1.

3. You can implement/use your own shortcode to embed videos and use it in questions/answers.

Regards,
ARI Soft
