
Custom CSS on 'Start Quiz' and 'Continue' buttons

Posted by vincentllora - 2019/05/13 19:08

Can you please provide the targeting for the 'Start Quiz' button - I want to change it to 'Begin Assessment'
I would also like to change the color on the 'Continue' button for multi page quizzes, if you can provide that target as well.

Thanks!

Hello,

You can read here how to edit an existing translation.

Open "Advanced" tab on "ARI Stream Quiz -> Settings" page and populate "Custom CSS Styles" parameter with the following code to change button background:

```
body .asq-theme.asq-theme-buzzfeed .button.button-green {  
  background-color: red;  
}
```

Regards,
ARI Soft

I also wanted to change the color of all the buttons. I tried putting in that code but it didn't change anything.

I actually want to change button colors to purple #800080 and hover color to #9932CC.

I've changed all the buttons successfully, thanks.

However, I'm having trouble changing the color of the progress bar. I found the CSS for it with the inspect tool (I think) ---

```
body .asq-theme .quiz-progress-bar {
  display: none;
  position: relative;
  height: 16px;
  line-height: 16px;
  font-size: 12px;
  overflow: hidden;
  margin-top: 30px;
  text-align: center;
  padding-right: 90%;
  background-color: #f5f5f5;
  -webkit-transition: padding 0.6s linear;
  -moz-transition: padding 0.6s linear;
  -o-transition: padding 0.6s linear;
  transition: padding 0.6s linear;
}
```

However, the "background-color: #f5f5f5;" parameter is of the 'unfinished' part of the progress bar. I can't see/find the code for the green 'finished' part of the progress bar. I want to change it to purple (#800080).

I tried this but it didn't do anything...

```
body asq.theme.asq-theme-standard .quiz-progress-bar {
  color: #f5f5f5;
  background-color: #800080;
}
```

then these 2 variations (just experimenting with inspect tool - I don't actually understand CSS too well!)...

```
body asq.theme.asq-theme-standard .quiz-progress-bar .data-content {
  color: #f5f5f5;
  background-color: #800080;
}
```

```
body asq.theme.asq-theme-standard .quiz-progress-bar .data-content-init {
  color: #f5f5f5;
  background-color: #800080;
}
```

Any help is greatly appreciated.

Use the following CSS rule:

```
body .asq-theme .quiz-progress-bar:after {background-color: #800080 !important;}
```

I have the same question: I do not find the opportunity to change the color of the green in the progress bar. Help is appreciated.

Add CSS rule from this post to "Custom CSS styles" parameter on "ARI Stream Quiz -> Settings -> Advanced" page.
