
Display caption under image

Posted by alejandrow - 2021/04/09 10:05

Hello,

How can we make the image captions to be displayed under the quiz images? The caption is not visible even though you write a caption on the image file. For some images, there is a need to display photo credits, but there is no where to do this. Normally the caption is used for this.

Hello,

Try the following, open "ARI Stream Quiz -> Settings -> Advanced" page and populate "Custom CSS styles" parameter with the following code:

```
.asq-theme .quiz-image-credit {position: static !important;}
```

It is not working, unfortunately. I use the Buzzfeed theme. But I also tried these:

```
.asq-theme.asq-theme-buzzfeed .quiz-image-credit {position: static !important;}  
.asq-theme-buzzfeed .quiz-image-credit {position: static !important;}
```

And none of them are working either. Any other idea on how to display the caption for images?

Sorry, it looks like a misunderstanding from our side. The plugin shows only "description" field from WordPress media gallery directly on an image. The code the our previous post move this description under the image. If you want to show "caption" instead of/or with "description" then it requires modification of the plugin. Images are generated in /includes/views/quiz-session/tmpl/image.php template file.
