Hi,

I changed some messages from frontend part of the plugin for existing translation. How do I place language file with modified messages to /wp-content/plugins/ari-stream-quiz/languages/override folder? Must I use a ftp to do that?

Thanks in advance,
Yami

Hi,

I placed the language file with my modified messages to (wordpress_folder)/wp-content/plugins/ari-stream-quiz/languages/override folder) using FileZilla. However, the changes aren't showing when I check my website. I only want to change some messages from frontend part of the plugin. What am I doing wrong?

Thanks,
