
How to send personality results to admin

Posted by spidermonkeydp - 2021/04/27 09:56

Hi AriSoft Stream Quiz Team,

I have a personality quiz where there is more than one personality type.

There's a top most winner with the highest score. But the second and third top most are also important to know.

I know that scores can be added to the results page for each personality but this is only visible to the quiz taker on the final results page. A

Is it possible to see the full score results of a personality test in the admin backend or send these full results to an admin email address?

I know that in the backend area I can see the answer each person gives to the questions. But with 64 questions in my quiz, it's not feasible to recalculate this to find the resulting score that contributes to each personality type.

many thanks for any help you can offer,

David

Hello,

Currently it is not possible to see results for each personalities on backend part. We will add this feature to our TODO list.

Regards,
ARI Soft
