Up-selling with Ari Quiz after taking quiz

Posted by drmaryam - 2021/05/05 17:15

_____

Is there an easy way to up-sell with hyperlinks after the results of the quiz are shown on the screen? It would be nice to show a button underneath the personality quiz results for the user to choose to learn more if they are interested. In fact it would great to show visual based or HTML based messages (call to action) after the quiz results are shown on the screen, other than just the social media share buttons. Is this possible?

_____

Hello,

It is possible to use HTML code in results template so button(s) can be added to it.

Regards,
ARI Soft

_____

Great. Is it under Quizes / my personality quiz I create / Settings / field called ?

Can you point me in the right direction how to do it? Do I just paste HTML code into this? Do you have a Guide on this?

_____

You can use "Content After Results Area" to add a button if want to show the same button for any result. Populate the parameter with the following code (just specify your redirect URL instead of https://www.google.com):

Navigate to another page
