
Lockout answers issue

Posted by inovalize - 2021/05/06 20:43

Hello, hope you're well!

The "lockout answers" option is disabled but I can't change the answer after select one.

I thought it was a plugin or theme conflict, but I disabled all plugins, except ARI Stream Quiz, and activated Twenty Twenty-One theme, and the issue continues.

All plugins and WordPress are up to date and there is no error on console.

Hello,

Could you provide a link to a quiz where the problem occurs?

Regards,
ARI Soft

You can't change answers because only one question is shown per page. The plugin complete a page automatically when an answer provided for last question on the page.

But what if I clicked by mistake? Do I need to press F5 on the page and start all over again?

Currently it is not possible to change answer for last question on a page. It does to avoid extra clicks.

Regards,

ARI Soft
