## Change social share buttons

Posted by Wissensmanagement - 2021/07/12 10:50

---

Hi,  
is it possible to change the social media share buttons on the results page? I would like to display smaller Fontawesome icons without text.

Hello,

This is possible, but it requires a little CSS knowledge. Each button has unique class name (e.g. button-facebook, button-twitter) and they can be used to add custom CSS rules and modify buttons styles.

Thank you for the reply. Is it possible to completely override the buttons and have Fontawesome icons instead?

It is possible if specify appropriate custom CSS rules for each button (to specify appropriate icons from FontAwesome).
