## Questions remains same not shuffling

Posted by aamir - 2021/09/06 06:15

---

Respected Admin,

Some of my users are reporting that after completing a session of questions, when we click play again button the same old question appear again instead of new one.

What should I do please?

Regards.

Hello,

Make sure "Random questions" parameters are enabled in quiz settings. Some questions can be repeated in next quiz session.

If it doesn't help, could you provide a link to a quiz where the problem occurs and send screenshot(s) of quiz settings by email?

Regards,  
ARI Soft
