
User name in email

Posted by hdhd - 2021/10/10 16:41

Hi, how do I include the users name as part of the email?

The name is captured with the email.

I cant see the variable {} for it.

Hello,

Use {\$name} predefined variable.

Regards,
ARI Soft

Hi - I tried this but it doesn't work.

It just shows {\$name} <https://www.ari-soft.com/images/fbfiles/images/name.png>

Hello,

Could you provide a temporary access to your WordPress backend by email so we can check settings and investigate the problem?

Regards,
ARI Soft
