
Can users end quiz where they want?

Posted by selym - 2021/10/22 14:26

First of all, I did a lot of quiz plugin testing and yours was the best I found, specifically for the quiz to seemingly self-center on the screen which strangely others did not. I did not want my users to have to scroll up/down to view/answer every question.

I have 2 questions.

1) I would like to create a really long quiz. Is it possible to allow users to end the quiz when they want and see their score up to that point, or is there no other option other than abandoning the quiz?

2) Can we add social networks to the Sharing Settings that show at the bottom of the quiz?

Thank you!

EDIT: And when I say add social networks, I mean add ones we don't see listed. (ie: Reddit, etc.)

Hello,

1. Sorry, but currently the plugin doesn't support this ability.

2. It requires modification of the plugin.

Regards,
ARI Soft

Thanks for the reply.

1) That's unfortunate, because my site is based on a single trivia quiz idea that will have thousands of questions. Best I can do is I guess give the answer to each question along the way.

- Somewhat related to the above, but what if I create a giant quiz and I set it for multipages with 1 question per page, and someone actually finishes the entire quiz. Is there a way I can prevent all of the questions from appearing at the end? Multipages appears to work during the quiz, but at the end it shows them all which I would think could be problematic for users to load all that data at once.

2) Ok, so not possible as is, thanks.
